How to download the Zoom app 📹

The Zoom app is great for virtual group conversations!

To ensure you have a delightful experience with your first Zoom conversation, please download and install the Zoom app beforehand.
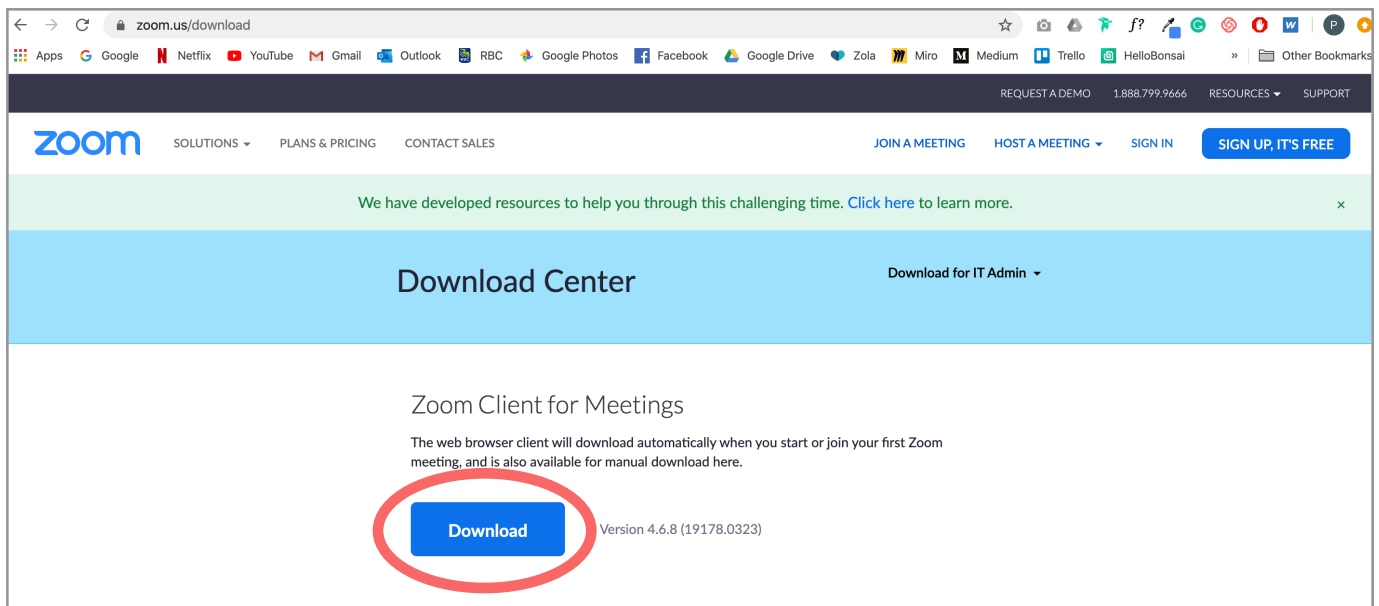

You can do it in either your laptop, tablet or phone.

## *Getting Zoom in your laptop/tablet:

You can also click on this link!

① Go to **https://zoom.us/download** and from the Download Center, click on the Download button under "Zoom Client For Meetings".
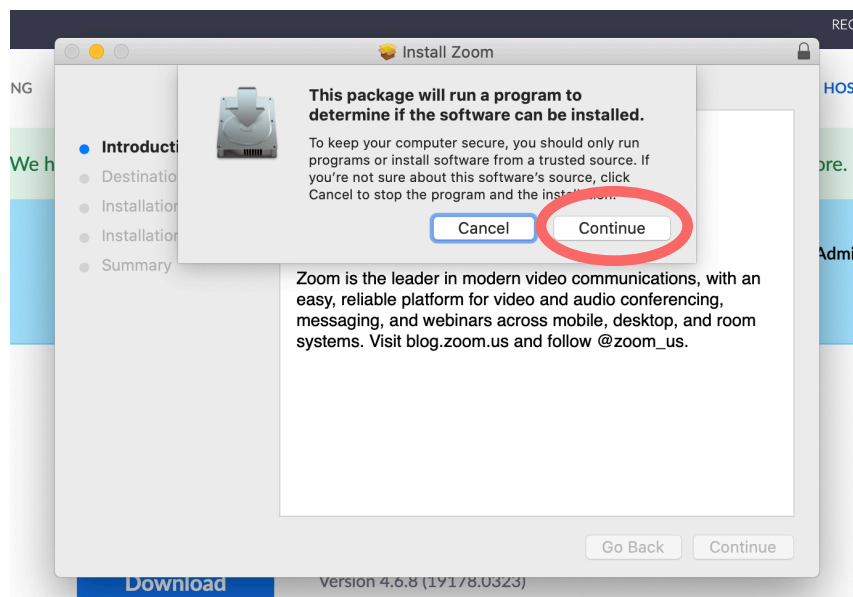

2 A file saying "Zoom (1)" will show up in the bottom left corner of your computer. Click on it.

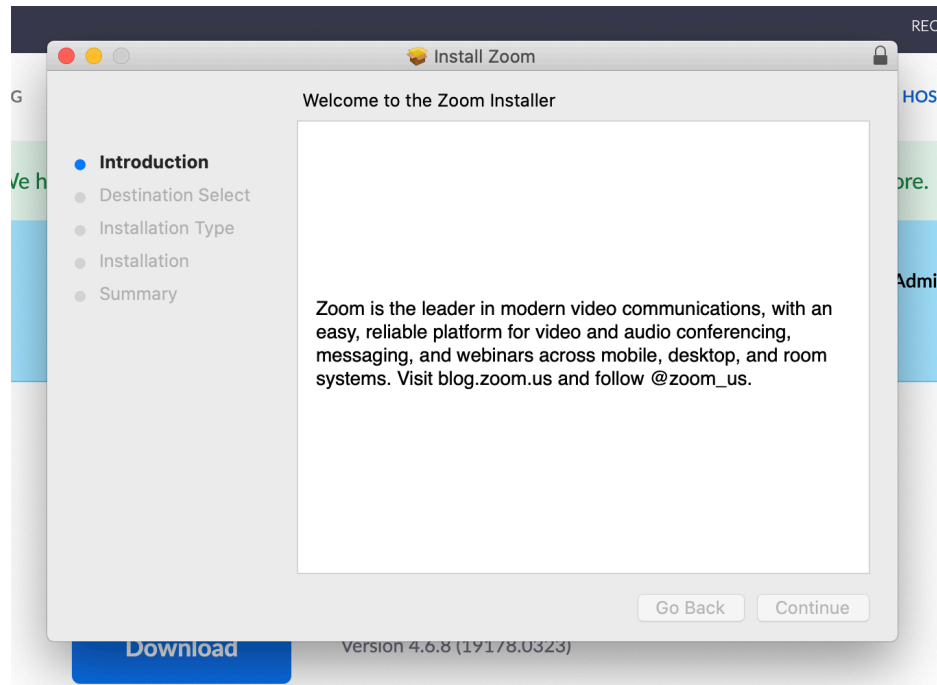

3 The file will open and show you this window. Click on "Continue"
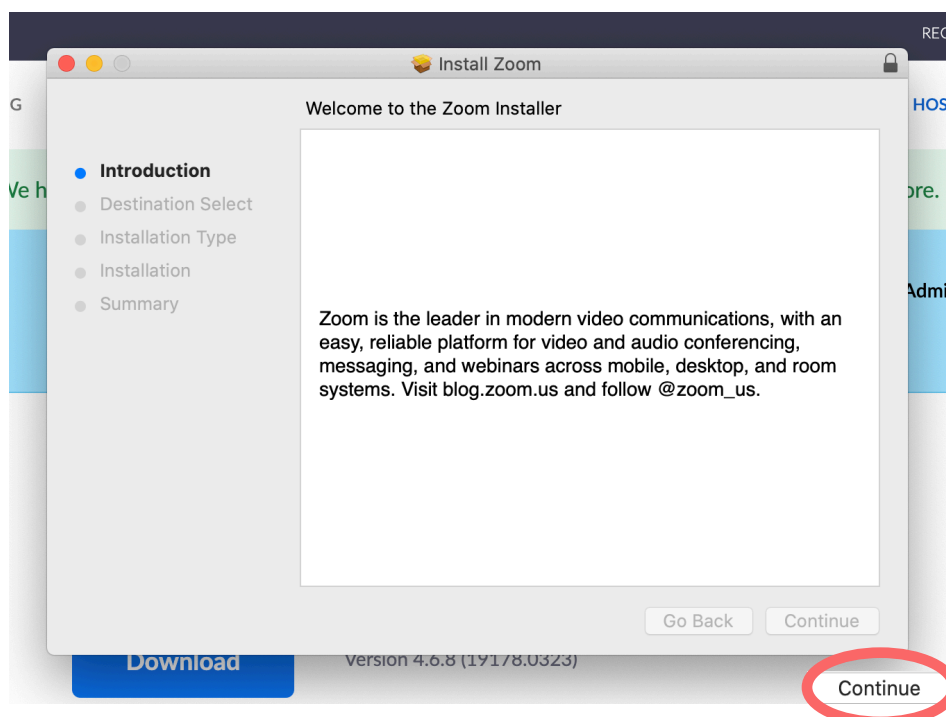

4 A window named "Welcome to the Zoom Installer" will pop up. It will stay there for several seconds. You don't need to do anything, just wait for it to disappear.

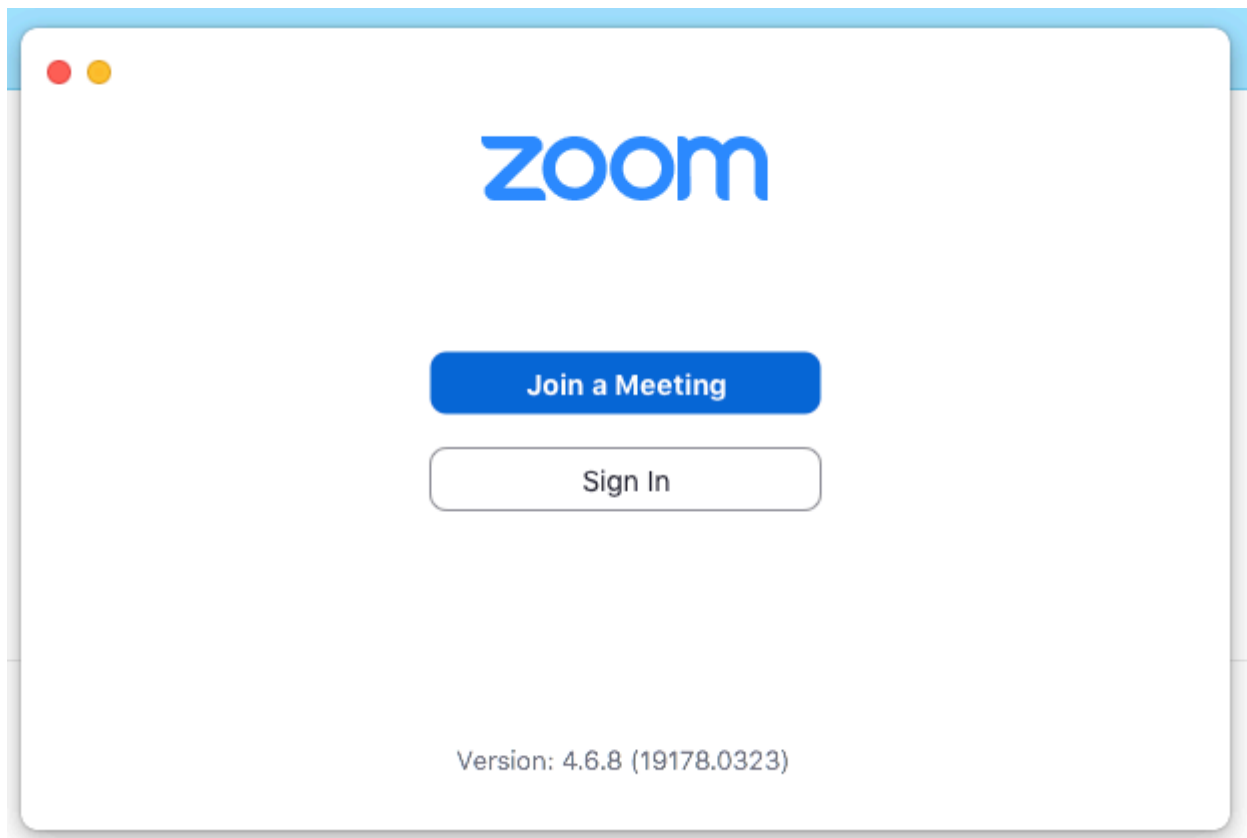

-However, if the Continue button is active in the bottom right corner, click on it.

This window will appear next. If you see this window, it means you have installed Zoom successfully! Good job.

This icon will appear in either your navigation dock (if you have a Macbook or iPad), or your laptop's desktop. This is the Zoom app icon, which is now part of your laptop.

*Getting Zoom in your phone:

① You can also download Zoom in your phone!

If you have an iPhone, go to the App Store
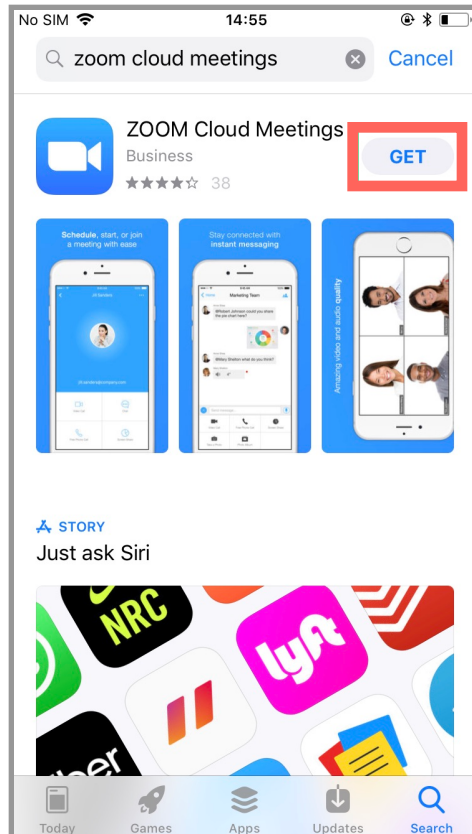

OR

If you have an Android, go to the play Store

② In the search field, type: "Zoom". Select the option that says "Zoom cloud meetings."
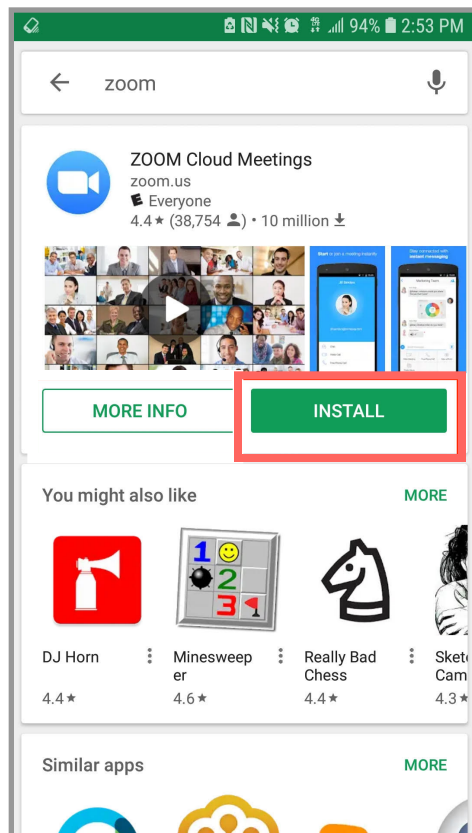

If you have an iPhone, you will see a screen similar to this one. Click Get.
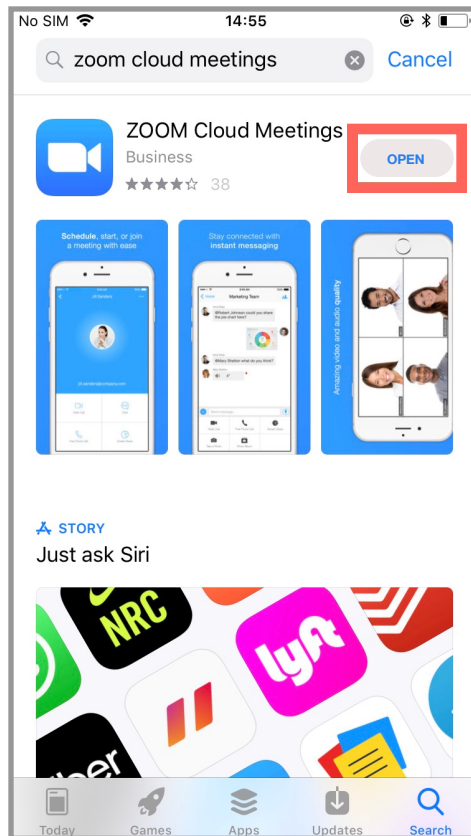

Zoom will automatically download for you.

OR

If you have an Android, you will see a screen similar to this one. Click Install.

Zoom will automatically download for you.

4

If you have an iPhone, you will see a screen similar to this one. Click Open.

All done! You now have the Zoom app in your phone.

OR

If you have an Android, you will see a screen similar to this one. Click Open.

All done! You now have the Zoom app in your phone.

You're now ready for your first Zoom meeting! Enjoy :)
